News from IPVS

Some news from IPVS

Dear members,

It is a pleasure to contact you again just after the deadline for the abstract submission to

hope that we can all meet in Sydney. I would like to remind you that you have the possibility to register at reduced price before the [Early Bird deadline on July 10th](#).

We have had serious challenges to obtain grants to support students and researchers with limited funds. We are doing our best to look for interested donors as we believe the conference is a major opportunity to improve our research and our impact in reducing the burden of HPV related disease.

I encourage you to go through the newsletter and find out on the member benefits for those researchers publishing in [PVR Journal](#). Do not miss that. We want PVR to be our journal and to be the best in Papillomavirus research and you can play a role in that!

I would also like to take this opportunity to congratulate Dr. Alejandra Picconi for the organization of the Regional meeting in Buenos Aires. The meeting that was partially supported by IPVS was a clear success in participation and in quality. The action that is going on in Argentina and generally in the Americas towards HPV disease reduction is phenomenal. Albeit many difficulties, the leadership and the belief that HPV related disease can be confronted with available tools is making a difference.

We are living in moments of great excitement, words like "*cervical cancer elimination*" are now being told in a wide range of settings. While IPVS strongly supports the dialog with different stakeholders to push for a proactive agenda towards elimination, we are certainly not alone. Recently Australia explicitly announced the path towards a drastic reduction of cervical cancer. Others, Canada for example, link their preventive interventions to the Sustainable Development Goals Agenda. We seem now to be ready at many different levels for a global comprehensive discussion including realistic and active scenarios to secure the necessary funds and personal efforts to achieve each day a step forward. We

With warm regards,

Silvia de Sanjosé

IPVS President
